DISPENSER SYSTEMS

UNIT SIZES
More than 50 years of experience and development work have resulted in the competence of Paul Voormann GmbH with its high-performance products for professional skin protection.

The skin protection program with the clearly arranged point system contains individual solutions and as a product combination particularly effective solutions from the area of skin protection, skin cleansing and skincare for various areas of application in industry and handicraft.

The family-owned company, now managed in its 2nd and 3rd generation, faces the changing demands of today’s working world with continuous innovation and the further development of its products and processes.

Focus here is placed on the acceptance and compatibility of its products for people as well as the environment.

The raw materials used are selected very carefully and based on strict quality criteria.

Paul Voormann GmbH focuses on sustainable products in the new development of its products. The company is a member of the RSPO (Roundtable on Sustainable Palm Oil) and therefore increasingly relies on the use of raw materials made from sustainably produced palm oil.

There are currently two products with EU Ecolabel in the product range - others are already being planned.

Dermatological reports from independent test laboratories confirm the high quality standard of the products.

The entire product range is manufactured in accordance with GMP (Good Manufacturing Practice) at the Velbert site and is subject to constant quality control.

The company is certified in accordance with DIN EN ISO 9001: 2008 and is a member of well-known German associations in the fields of chemistry, cosmetics and occupational safety.

Paul Voormann GmbH combines a high level of service and flexibility with its corporate values of loyalty and reliability. This results in the trust of customers and trading partners throughout all parts of the world.

TRUST IN QUALITY
For the protection of your skin
EU ECOLABEL
Environmentally conscious hygiene

The EU Ecolabel is the EU eco-label recognised in all Member States of the European Union, but also in Norway, Liechtenstein and Iceland. The voluntary label, introduced in 1992 by an EU regulation, has become a reference for consumers who want to help reduce pollution by purchasing greener products and services.

Paul Voormann GmbH currently offers two products with the EU Ecolabel, a foam soap and a hand cleaner with walnut meal for coarse soiling. A third product is scheduled to be introduced soon. This will be a high-quality liquid soap, also for sensitive skin, for cleansing hands and body.

For cosmetic products, the EU Ecolabel stands for:

- A lower burden on aquatic ecosystems
- Strict compliance with biodegradability requirements
- Restriction of packaging waste
SKIN PROTECTION

Appropriate skin protection products are applied to the skin prior to work as protection against aqueous or non-aqueous substances as well as against UV radiation or other special forms of skin stress. Skin protection products can help prevent occupational skin diseases if used consistently. In addition, skin protection products also make it easier to cleanse heavy soiling.
AREAS OF APPLICATION
Aqueous and non-aqueous substances - Some examples are:

- Cooling lubricants, aqueous solutions
- Oils, greases, tar, bitumen, paints, soot, pigments, cement, lime
- Various adhesives, PU foams, sealing materials

PROPERTIES
- Generally applicable
- Very absorbent
- Facilitates skin cleansing
- Special polymer-based film-forming agent protects the skin from various substances
- Reduces contact of substances with the skin

COMPOSITION
- Lotion (O/W emulsion)
- with natural chamomile active ingredient (bisabolol)
- Non-greasing
- pH-neutral to skin
- Scented
- Silicone-free

UNIT SIZES
100 ml tube, 0.5 l dispenser bottle, 1 l bottle, 1 l soft bottle, 1 l Care&Clean bottle, 2 l soft bottle, 10 l canister

AREAS OF APPLICATION
Aqueous and non-aqueous substances - Some examples are:

- Cooling lubricants, aqueous solutions
- Oils, greases, tar, bitumen, paints, soot, pigments, cement, lime
- Various adhesives, PU foams, sealing materials

PROPERTIES
- Generally applicable
- Very absorbent
- Facilitates skin cleansing
- Special polymer-based film-forming agent protects the skin from various substances
- Reduces contact of substances with the skin
- Also suitable for sensitive skin and HACCP rated

COMPOSITION
- Lotion (O/W emulsion)
- with natural chamomile active ingredient (bisabolol)
- Non-greasing
- pH-neutral to skin
- Non-scented
- Silicone-free

UNIT SIZES
100 ml tube, 1 l bottle, 1 l soft bottle
**AREAS OF APPLICATION**
Non-aqueous substances - Some examples are:

- Oils, fats, lubricants
- Cast-iron and graphite dusts
- Paints, varnishes, adhesives
- Soot, tar & bitumen
- Many other strongly adhering, non-aqueous substances

**PROPERTIES**
- Facilitates the cleaning process by adding dirt-binding ingredients and skin-friendly, mild surfactants
- In some cases it is not necessary to use a detergent as the dirt can be easily washed off with water.
- Can be easily distributed on the skin and is quickly absorbed

**COMPOSITION**
- Suspension
- Washable
- Non-greasing
- pH-neutral to skin
- Silicone-free

**UNIT SIZES**
100 ml tube, 1 l bottle, 1 l soft bottle

---

**AREAS OF APPLICATION**
Aqueous substances - Some examples are:

- Aqueous solutions, dispersion paints, mortar
- Drilling emulsions, lime milk
- Cleansing agent
- Gardening and agriculture
- Hairdressing

**PROPERTIES**
- Protects against water-soluble pollutants
- Promotes suppleness of the skin

**COMPOSITION**
- Cream (W/O emulsion)
- Strong greasing properties
- Very absorbent
- Silicone-free

**UNIT SIZES**
100 ml tube
**PEVASAN GEL**

**AS PROTECTION AGAINST SKIN SOFTENING**

**AREAS OF APPLICATION**
- Protects against skin softening when wearing gloves and shoes
- Mechanical loads and work in moist areas

**PROPERTIES**
- Strengthens the upper layers of the skin and enhances its protective function
- Swelling of the skin is reduced
- Reduces fingerprints and absorbs very quickly

**COMPOSITION**
- Alcoholic-aqueous gel with witch hazel extract
- with moisturising substances and skincare substances: Glycerine, D-panthenol, chamomile active ingredient (bisabolol)
- Non-greasing and silicone free
- Without preservatives (according to EU regulations) and perfume oils

**UNIT SIZES**
- 100 ml bottle, 1 l bottle, 1 l Care&Clean bottle, 2 l soft bottle

---

**PEVASAN UV30**

**AS PROTECTION AGAINST SKIN DAMAGE BY ULTRAVIOLET RAYS - WITH SUN PROTECTION FACTOR 30**

**AREAS OF APPLICATION**
- UV exposure to technical radiation sources (e. g. during welding work)
- UV exposure to solar radiation (e. g. in road construction and leisure time)

**PROPERTIES**
- With sun protection factor 30
- High protection against UV-A, UV-B and UV-C radiation
- With highly effective radical catchers

**COMPOSITION**
- Suspension (O/W emulsion)
- Waterproof
- Low-greasing
- Very absorbent
- Lightly scented
- Silicone-free

**UNIT SIZES**
- 100 ml tube
SKIN CLEANSING

Gentle and thorough skin cleansing is an important prerequisite for healthy skin. Skin cleansing products should be adapted to the type and intensity of the respective soiling. Generally speaking, the product should be as strong as necessary and as gentle as possible to cleanse the skin.
PEVAPLUS

MILD SKIN CLEANSING LOTION

AREAS OF APPLICATION
For light soiling, such as:
- in office and administration
- light storage and packaging activities

PROPERTIES
- Mild cleansing lotion
- Good skin tolerance
- Suitable for the cleansing of hands and body

COMPOSITION
- Lotion
- Scented
- pH-neutral to skin
- Pearlescent
- Silicone-free

UNIT SIZES
- 0.5 l dispenser bottle, 1 l, 2 l soft bottle, 10 l canister

PEVAPLUS PURE

MILD SKIN CLEANSING LOTION - NON-SCENTED

AREAS OF APPLICATION
For light soiling, such as:
- in office and administration
- light storage and packaging activities

PROPERTIES
- Mild cleansing lotion
- Good skin tolerance
- Suitable for the cleansing of hands and body

COMPOSITION
- Lotion
- Non-scented
- pH-neutral to skin
- Pearlescent
- Silicone-free

UNIT SIZES
- 1 l bottle, 10 l canister
**PEVASAN HRL**

**HIGH-QUALITY, PARTICULARLY MILD SKIN CLEANSING LOTION**

**AREAS OF APPLICATION**
For light soiling, such as:
- in office and administration
- in medical departments and nursing facilities
- in the food-processing trade
- light storage and packaging activities

**PROPERTIES**
- Very good skin tolerance
- Gentle to the skin thanks to sugar surfactants
- Refattening with glycerine derivatives
- Suitable for the cleansing of hands, body and hair

**COMPOSITION**
- Lotion
- Scented
- pH-neutral to skin
- Pearlescent
- Silicone-free

**UNIT SIZES**
- 250 ml shower gel tube
- 0.5 l dispenser bottle
- 1 l bottle
- 2 l soft bottle
- 10 l canister

---

**PEVASAN PURE**

**HIGH-QUALITY, PARTICULARLY MILD SKIN CLEANSING LOTION - NON-SCENTED**

**AREAS OF APPLICATION**
For light soiling, such as:
- in office and administration
- in medical departments and nursing facilities
- in the food-processing trade
- light storage and packaging activities

**PROPERTIES**
- Very good skin tolerance
- Gentle to the skin thanks to sugar surfactants
- Refattening with glycerine derivatives
- Also suitable for sensitive skin and HACCP rated
- Suitable for the cleansing of hands, body and hair

**COMPOSITION**
- Lotion
- Non-scented
- pH-neutral to skin
- Pearlescent
- Silicone-free

**UNIT SIZES**
- 0.5 l dispenser bottle
- 1 l, 2 l soft bottle
- 10 l canister
**AREAS OF APPLICATION**
For light soiling, such as:

- in office and administration
- in medical departments and nursing facilities
- in the food-processing trade
- in washing rooms in general

**COMPOSITION**
- Lotion
- Scented
- pH-neutral to skin
- Pearlescent
- Silicone-free

**UNIT SIZES**
1 l Care&Clean bottle

---

**AREAS OF APPLICATION**
For light to medium soiling, such as:

- in the food-processing industries, kitchens and nursing facilities, etc.

**COMPOSITION**
- Lotion
- Alcohol-based
- Free from perfume oils, paint and preservatives
- Silicone-free

**UNIT SIZES**
1 l bottle, 2 l soft bottle
With our foam soaps, you can pamper the hands of your colleagues, employees or customers with a silky-soft foam that turns washing your hands into a special experience. A high concentration of glycerine, a skincare substance, prevents the skin from drying out.

Thorough hand washing several times a day reduces the risk of the transmission of many illnesses and thus also reduces follow-up costs and absenteeism due to illness. With high-quality foam soaps, people are offered an additional incentive to wash their hands regularly. Our foam soaps are yielding in productive operation. One litre of foam soap is enough for up to 2,500 applications.
AREAS OF APPLICATION
For light soiling, such as:
• in office and administration
• in washing rooms in general
• in the food-processing trade

PROPERTIES
• Gentle to the skin thanks to sugar surfactants and glycerine
• Also suitable for sensitive skin and HACCP rated
• Was awarded the EU Ecolabel
• Suitable for the cleansing of hands and body

COMPOSITION
• Aqueous solution
• Fine-bubble, creamy foam
• Non-scented
• pH-neutral to skin
• Silicone-free

UNIT SIZES
1 l Care&Clean bottle

AREAS OF APPLICATION
For light soiling, such as:
• in office and administration
• in washing rooms in general

PROPERTIES
• Gentle to the skin thanks to sugar surfactants and glycerine

COMPOSITION
• Aqueous solution
• Fine-bubble, creamy foam
• Scented
• pH-neutral to skin
• Silicone-free

UNIT SIZES
1 l Care&Clean bottle
NATURAL CLEANSING
Biological rubbing agents against dirt

Rubbing agents in skin cleansing products make an important contribution to the removal of heavy soiling. They reinforce the cleansing power of the washing surfactants with a mechanical component and thus enable thorough skin cleansing.

When selecting the rubbing agents, we have always attached great importance to good skin compatibility. The synthetic rubbing agents we use in Pevastar and other products made of finely ground polyurethane foam (PU) feel extremely fine and hardly abrasive on the skin, but at the same time make a great contribution to cleaning.

In addition to the skin compatibility and cleansing power of rubbing agents, the effects on the environment have also been a hot topic for quite some time now. Plastics in wastewater should be considered critically, as they should not enter the aquatic environment. Due to the relatively high density (>1 g/ml) of the PU rubbing agents we use, it sinks to the ground in the settling basin of sewage treatment plants and collects in the sewage sludge. A study conducted by the University of Stuttgart has confirmed that our PU rubbing agents are effectively removed from the wastewater in sewage treatment plants.

We have developed various PEVA hand cleaners with natural rubbing agents for the different degrees of soiling and requirements. We use rubbing agents made of walnut shell and corn cob meal in our products. Our rubbing agents do not compete with food products because we do not use edible ingredients. The walnut shell abrasive is a powder which is obtained from the shells of already opened walnuts. In the case of corn cob rubbing agents, the corn cob spindle is processed into rubbing agents - the corn grains have been removed during threshing. Walnut shell rubbing agents feel very fine on the skin, yet at the same time provide very good cleaning properties (similar to PU rubbing agents). Corn cob rubbing agents feel a little coarser, are lighter in terms of colour and also clean very well.
AREAS OF APPLICATION
For the effective removal of heavy soiling in all industrial sectors, such as:

- Oils, fats, lubricants
- Dusts, graphite, soot
- Various types of paint and printer toner

PROPERTIES
- Cleans down to the pores
- Skin-friendly
- Refattening
- Does not clog drains

COMPOSITION
- Fluid paste with skin-friendly, natural rubbing agents made of walnut shell meal
- Contains an optimally balanced, synergistic surfactant combination
- With a high proportion of natural-based refattening
- pH-neutral to skin and silicone-free

UNIT SIZES
250 ml tube, 2 l bottle, 3 l can, 4 l soft bottle, 5 l canister, 10 l bucket, 30 l hobbock
**PEVACLEAN**

**HAND CLEANER WITH NATURAL RUBBING AGENTS**

**AREAS OF APPLICATION**
For the removal of heavy soiling in all industrial areas, such as:
- Oils, fats, lubricants
- Dusts, graphite, soot

**PROPERTIES**
- Cleans thoroughly
- Skin-friendly
- Refattening
- Does not clog drains

**COMPOSITION**
- Fluid paste with, natural rubbing agents made of corn cob meal
- Contains an optimally balanced, synergistic surfactant combination
- Natural refattening
- pH-neutral to skin
- Silicone-free

**UNIT SIZES**
- 2 l soft bottle, 3 l can, 4 l soft bottle, 10 l bucket, 30 l hobbock

---

**PEVACLEAN ECO**

**ENVIRONMENTALLY-FRIENDLY HAND CLEANER WITH NATURAL RUBBING AGENTS**

**AREAS OF APPLICATION**
For the effective removal of heavy soiling in all industrial sectors, such as for example:
- Oils, fats, lubricants
- Dusts, graphite, soot
- Various types of paint and printer toner

**PROPERTIES**
- Cleans down to the pores
- Particularly skin friendly
- High refattening properties
- Also suitable for sensitive skin
- Does not clog drains
- Was awarded the EU Ecolabel

**COMPOSITION**
- Fluid paste with skin-friendly, natural rubbing agents made of walnut shell meal
- Contains an optimally balanced, synergistic surfactant combination
- With a high proportion of natural-based refattening
- pH-neutral and silicone-free

**UNIT SIZES**
- 250 ml tube, 1 l Clean&Care bottle, 2 l soft bottle, 3 l can, 4 l soft bottle, 10 l canister
## PEVA INTENS

**INTENSIVE SPECIAL HAND CLEANER**

### AREAS OF APPLICATION
For the effective removal of extreme soiling, such as:
- Varnishes (e.g. two-component varnishes)
- Paints, acrylic paints
- Special adhesives, PU foams
- Resins (e.g. epoxy resins), etc.

### COMPOSITION
- Powerful and reliable cleaning properties
- Skin friendly thanks to good refattening system
- Ideal for use in many special areas
- Does not clog drains

### UNIT SIZES
- 250 ml tube, 2 l soft bottle, 3 l can

## PEVA PREMIUM

**PREMIUM HAND CLEANER WITH NATURAL RUBBING AGENTS**

### AREAS OF APPLICATION
For the effective removal of extreme soiling in all industrial sectors, such as for example:
- Varnishes (e.g. two-component varnishes)
- Paints, acrylic paints
- Special adhesives, PU foams
- Resins (e.g. epoxy resins), etc.
- Oils, fats, lubricants, etc.

### COMPOSITION
- Fluid paste with skin-friendly, natural rubbing agents made of walnut shell meal
- With environmentally neutral, skin-friendly ester oils for cleaning support
- Silicone-free

### UNIT SIZES
- 250 ml tube, 2 l soft bottle, 3 l can

---

**SKIN CLEANSING FOR EXTREME SOILING**
SKINCARE

Skincare products are applied to cleansed, dry skin after work and provide the stressed skin with necessary nurturing substances. These substances support the skin’s natural ability to regenerate.
### Areas of Application
Following light to severe skin stress:

- For care after frequent and intensive skin cleansing
- For the regeneration of damaged skin areas
- To maintain skin elasticity

### Properties
- Substance-rich
- Light refattening properties, easy to apply to skin and quickly absorbent
- Suitable for all skin types
- Can be used on the entire body
- Special moisturiser prevents excessive drying of the skin

### Composition
- Lotion (O/W emulsion)
- With high-quality skincare components: Natural camomile active ingredient (bisabolol), D-panthenol, keratin, vitamin E and A, natural oils
- pH-neutral to skin
- Non-scented
- Silicone-free

### Unit Sizes
100 ml tube, 0.5 l dispenser bottle, 1 l bottle, 1 l soft bottle, 1 l Care&Clean bottle, 2 l soft bottle
**AREAS OF APPLICATION**

- For care after frequent and intensive skin cleansing
- For the regeneration of damaged skin areas
- To increase the moisture content of the skin

**PROPERTIES**

- Substance-rich
- Intense fattening properties - with 5% urea, it is suitable for the intense treatment of dry skin
- Also suitable for sensitive skin
- Very absorbent
- Suitable for the entire body

**COMPOSITION**

- Cream (O/W emulsion)
- With 5% urea, glycerine and panthenol
- Light, fruity fragrance
- pH-neutral to skin
- Silicone-free

**UNIT SIZES**

100 ml tube, 1 l soft bottle, 1 l Care&Clean bottle
SENSITIVE SKIN
Suitable skin-protection products

An increasing number of people suffer from sensitive or hypersensitive skin. There are many reasons for this. In addition to a genetic predisposition, physical stimuli (e.g. mechanical stress), chemical stimuli (e.g. from working materials) or environmental influences (e.g. heat and cold) are possible triggers. Besides this, the psyche also has a great influence on the skin.

To keep the stress at the workplace as low as possible, the skin products used should also be tailored to the special needs of the employees.

The good skin compatibility of our products has always been a particularly important concern for us. Based on our proven standard qualities, we have adapted some products to the special requirements of sensitive skin and developed new products for this purpose.

The products designed for this purpose can generally also be used by all other employees in the company without having to dispense with the usual product benefits (e.g. protection properties or cleaning performance).

The following products are recommended especially for sensitive skin. We have had these products tested on test persons with sensitive skin as part of a dermatological examination under specialist medical supervision. All products were rated "very good".
PEVAPERM PURE

PEVASAN PURE

PEVAFOAM ECO

PEVACLEAN ECO

PEVALIND PURE

PEVACARE UREA

MADE IN GERMANY | A4/181272

ALLERGIE-SAFE, VEGAN, 100% NATUREL

Allgemein anwendbare Hautschutz-Lotion mit Kaminobenzolkoff. Schützt vor wässrigen und nicht wässrigen Arbeitsstoffen und erleichtert die Hautreinigung.

Generally applicable Skin Protection Lotion. Protects the skin from aqueous and greasy soiling.
CLASSICS
Our classics for your skin

This section contains our skin cleansing products which have been tried and tested for decades.

AREAS OF APPLICATION
For the effective removal of stubborn or strongly adherent soiling caused by:
- Synthetic resin, nitro and gravure printing inks
- Various adhesives, sealing materials
- Oils, fats, tar, bitumen
- PU foams, graphite, resins, soot

PROPERTIES
- Cleans deep down to the pores without water
- Skin-friendly
- Refattening

COMPOSITION
- Cream (O/W emulsion)
- With high-quality, skin-friendly synthetic rubbing agents (PU)
- With vegetable glycerides and natural Shea butter
- Silicone-free

UNIT AND PACKAGE SIZES
200 ml tube, 0.5 l can, 1 l bag, 2 l soft bottle, 3 l can, 10 l bucket, 30 l hobbock
**AREAS OF APPLICATION**
For the removal of soiling in many industrial areas, such as:
- Oils, fats, dusts, soot
- Printer inks, etc.

**PROPERTIES**
- Non-fluid
- Cleans down to the pores
- Skin-friendly
- Does not clog drains

**COMPOSITION**
- Paste
- With skin-friendly wood powder rubbing agents
- pH-neutral to skin
- Silicone-free

**UNIT AND PACKAGE SIZES**
0.5 l can, 5 l bucket, 10 l bucket

---

**AREAS OF APPLICATION**
For the removal of soiling in all areas of industry, handicrafts, agricultural operations, horticulture, etc. caused by:
- Oils, fats, dusts, soot
- Printer inks, etc.

**PROPERTIES**
- Non-fluid
- Cleans down to the pores
- Skin-friendly
- Does not clog drains

**COMPOSITION**
- Paste
- With skin-friendly synthetic rubbing agents (PU)
- pH-neutral to skin
- Silicone-free

**UNIT AND PACKAGE SIZES**
0.5 l can, 5 l bucket, 10 l bucket
DISPENSER

Hygienic, economical, efficient

With our dispenser systems you can dispense skin protection, skin cleansing and skincare products hygienically and economically. With more than 50 years of experience, we have developed several dispenser systems ourselves, paying particular attention to user-friendliness and durability. Our skincare products and dispensers are ideally matched: For trouble-free operation and economical dosing.

THE NEW SOFT BOTTLE SYSTEM 4.0
Hygienic – economical – user-friendly

Paul Voormann brings the new generation of soft bottle systems directly to your workplace. Hygienic, economical, user-friendly – so that you can focus on the essentials of your work.

Up to now, when deciding on a dispenser system for skin cleansing products, companies have been faced with the choice between a good but also cost-intensive solution (e.g. 2-litre soft bottle systems) or an inexpensive but hygienically disadvantageous solution (dispensers for open refilling or the use of hand cleansers directly from large buckets).

With the unique 4-litre soft bottle, we combine the hygienic advantages of the introduced 2-litre soft bottle system with the economical advantages of refilling systems or large containers such as buckets or canisters.

**HYGIENIC** because the actual wall dispenser has no contact with the hand cleaner and therefore cannot contaminate the hand cleaner (no risk of contamination).

**ECONOMICAL** because compared to 2l soft bottles, a significantly lower price per litre of hand cleaner can be achieved, or a price per litre which tends to be more in the range of refilling systems.

**USER-FRIENDLY** because no hand cleaner can be spilled when refilling and because the quantity of 4l per bottle allows long bottle change intervals. When changing the bottle, only a new bottle has to be inserted into the dispenser.

Our dispensers are available for the 4-litre soft bottle system in plastic and metal (version with white powder-coated cap or as a version with a satin brushed stainless steel cap).
Each bottle has its own dosing pump for a peak value of hygiene.

The wall mounted dispenser has no direct contact with the hand cleaner. The pumping movement is transmitted from the bush-button to the dosing pump on the bottle.

The bottle collapses through a vacuum inside (less volume for waste removal) and has good depletion properties.

NO REFILLING NECESSARY
FOR CLEAN & HYGIENIC HANDS
PEVAMAT CARE&CLEAN
1 L dispenser system

- Available as manually operated dispenser and as a touchless version.
- For this dispenser system, we offer a complete range of skin protection, skin cleansing and skincare products (also hand cleansers with rubbing agents).
- Maximum hygiene thanks to bottles with integrated dosing pumps, which are exchanged when the bottle is changed - and the option to use touchless dispensers.
- No drilling required for installation, as each dispenser has an adhesive pad attached to the back of the dispenser.
- The timeless design and small size make the dispenser system suitable for both industrial and washroom use.
