

THE NEW PEVALIN SPEZIAL WITH 100 % NATURAL ABRASIVES

„Even good things have to continue to develop when the time comes“

Paul Voormann has lifted the formulation of **PEVALIN SPEZIAL**, the well-known Handcleansing Cream for extreme soiling, to the latest state of the art.

The product now contains exclusively natural abrasives from corn cob meal and walnut shell meal and a new, modern solvent, without mineral oils, which offers even better cleaning performance.

Key features of the product, such as the pleasant smell of orange and the refat-tening of the skin with shea butter, have naturally been retained!

In addition, the product is now available in an attractive and practical plastic tube instead of the aluminium tube with folding box.

PEVALIN SPEZIAL

 HANDCLEANSING CREAM WITH SHEA BUTTER - SPECIAL PRODUCT FOR EXTREME SOILING AS IN THE PAINTER´S CRAFT

AREAS OF APPLICATION

For the effective removal of stubborn or strongly adherent soiling caused by:

- Synthetic resin, nitro and gravure printing inks
- Various adhesives, sealing materials
- Oils, fats, tar, bitumen
- PU foams, graphite, resins, soot

PROPERTIES

- Cleans down to the pores
- Skin-friendly
- Refattening
- Does not clog drains

APPLICATION

Rub into dirty, dry hands without water until the dirt dissolves. Add a little water, continue to wash and rinse well. Do not expose to plastic materials.

COMPOSITION

- Cream (O/W emulsion)
- With high-quality, skin-friendly natural abrasives made from corn cob meal and walnut shell meal
- With natural shea butter
- pH-neutral to skin
- Silicone-free
- Dermatologically tested with a rating of „very good“

UNIT AND PACKAGING SIZES

250 ml tube, 0,5 l jar, 1 l bag, 2 l soft bottle, 3 l can, 10 l bucket, 30 l bucket

Information about the new natural abrasives

The abrasives used in **PEVALIN SPEZIAL** are obtained by grinding threshed corn cobs (the grains have already been removed) and walnut shells. This means that there is no competition with food. Walnut shells and corn cobs come from European cultivation. Walnut shells and corn cobs are finely ground, have a light brown or beige colour and clean reliably without damaging the skin.

According to current findings, walnut shells are also safe to use as an abrasive for people with nut allergies. Ground walnut shells have been used for many decades in hand cleaners for coarse soiling.
