

PEVA FOOT SPRAY

Deodorizing and refreshing **FOOT SPRAY** to reduce the formation of perspiration and unpleasant odours in work shoes.

PROPERTIES

PEVA FOOT SPRAY protects the feet from excessive perspiration in work shoes and from the formation of unpleasant odours.

- ✓ in addition to the protective effect, the product also contains nourishing, natural substances that can hydrate the skin
- ✓ pleasant, natural smelling spray that is easy to spray on and that does not wet socks and shoes
- ✓ can also be used to deodorize footwear after testing the material compatibility in an inconspicuous area

COMPOSITION

PEVA FOOT SPRAY is a liquid that contains alcohol with a range of high-quality, herbal active and care ingredients.

- suitable for preventing skin softening and sweating. This effect is based on a high proportion of a special extract containing tannin (*Hamamelis virginiana* = witch hazel), which firms and therefore deodorises the skin and also affects excessive germ growth
- contains glycerine as an excellent moisturiser, which increases the skin's ability to maintain hydration*
- contains rosemary, sage and eucalyptus essential oils, which give the spray a pleasant fragrance with a partially antiseptic effect and has astringent properties and therefore enhance the effect of witch hazel*
- silicone-free

- contains no preservatives (in accordance with Annex V EC Regulation on cosmetics) and synthetic perfume oils

APPLICATION

Spray the feet 1-2 times at a distance of approx. 10 cm.

Note: Do not spray into eyes or onto mucous membranes. Do not spray on naked flames. Flammable.

PRODUCT DESCRIPTION

PEVA FOOT SPRAY is a liquid solution that contains alcohol and natural essential oils.

pH value: not defined

Density: approx. 0.81 g/cm³ (20°C)

*according to scientific literature

LEGAL REGULATIONS

PEVA FOOT SPRAY is subject to the EU Cosmetics Regulation and in Germany to the Food, Commodities and Feed Code (LFGB).

All our cosmetic products are manufactured according to GMP (Good Manufacturing Practice) and undergo microbial quality control, as required by the EU Cosmetics Regulation.

SKIN CARE TIPS

In the unavoidable handling of harmful substances, a suitable skin protection agent should be used to prevent skin damage before starting work (e. g. the generally applicable skin protection lotion **PEVAPERM**).

Depending on the type of contamination, use a suitable hand cleaning agent (e.g., **PEVASTAR** moderate to heavy soiling or **PEVA PREMIUM** for extreme soiling).

After work, the skin should be regularly rubbed with a suitable skin care product (e. g. **PEVALIND**, the active substance-rich skin care lotion) to regenerate the skin.
